Allucinogeni – indivisiblesomerville.org

Allucinogeni (dal verbo lat. alucināri, allucināri; ingannarsi, derivante dalla radice gr. aluo, alusso: vaneggiare, esser fuori di sé, o dal lat. lux: luce) è un termine-ombrello che racchiude vari gruppi eterogenei di sostanze capaci di modificare per alcune ore le percezioni, i pensieri e le sensazioni in modo più o meno netto in base alla sostanza e al dosaggio.

Allucinogeno – Wikipedia

Hallucinogen persisting perception disorder (HPPD) is a chronic disorder in which a person has non-psychotic flashbacks of visual hallucinations or distortions experienced during a previous hallucinogenic drug experience, usually lacking the same feelings of mental intoxication experienced before. Hallucinations are usually not intense or impairing and consist of visual snow, trails and after ...

Hallucinogen persisting perception disorder – Wikipedia

Gli allucinogeni sono sostanze psicoattive capaci di causare 'sostanziali e transitorie modificazioni della percezione, del pensiero e dell'umore'. Possono essere classificate in base al loro meccanismo d'azione oppure in base alla loro struttura chimica.
