The Urinary System • The urinary system is composed of paired kidneys and ureters, the urinary bladder, and the urethra. • Urine is produced in the kidneys, and then drains through the ureters to the urinary bladder, where the urine is stored. Urine is eliminated from the body through the urethra. • Label this diagram:

Designed to accompany The Anatomy and Physiology Learning System, 4th Edition, by Edith Applegate, this study guide helps you learn and review basic A&P concepts. Each chapter emphasizes medical terminology with a set of key terms, word parts, clinical terms, and abbreviations, and then adds a variety of fun-filled learning exercises, review questions, a quiz, and a word puzzle. The study guide corresponds to the textbook chapter for chapter. Chapter learning objectives help you focus on the most important material. Key concepts are defined on the first page of each chapter in the workbook. Learning exercises for each chapter include short answer, matching, and diagrams to label and color. Self-quizzes allow you to measure your progress and

Online Library Anatomy Review Urinary System

Understanding. Fun and Games features end each chapter with a variety of engaging puzzles covering words and concepts. A chapter summary provides a brief review of each chapter. A chapter review provides questions for reinforcement and review of the concepts in each chapter.

An Easier and Better Way to Learn Anatomy. The Anatomy Coloring Workbook, 4th Edition uses the act of coloring to provide you with a clear and concise understanding of anatomy. This interactive approach takes less time than rote memorization, and thoroughly fixes anatomical concepts in your mind for easier visual recall later. An invaluable resource for students of anatomy, physiology, biology, psychology,
