Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

Now in its third edition, this informative and indispensable reference reviews fundamental information about fluids, electrolytes, and acid-based balance; identifies electrolyte fluid, acid, and base imbalances; describes imbalances in major health problems, and more in an easy-to-understand format.

From temperament to trait to disorder, the spectrum of personality encompasses the true meaning of a bio-psycho-social condition. For the clinician, the challenge of trying to understand distinctions between normal and disturbed, unpleasant and malignant, and treatable and untreatable, is daunting to say the least.

This manual attempts to provide simple, adequate and evidence-based information to health care professionals in primary health care especially in low- and middle-income countries to be able to provide pharmacological treatment to persons with mental disorders. The manual contains basic principles of prescribing followed by chapters on medicines used in psychotic disorders; depressive disorders; bipolar disorders; generalized anxiety and sleep disorders; obsessive compulsive disorders and panic attacks; and alcohol and opioid dependence. The annexes provide information on evidence retrieval, assessment and synthesis and the peer view process.

The AJN Book of the Year award-winning textbook, Psychiatric Nursing: Contemporary Practice, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

A patient's personal view of long term care. Seen through the eyes of a patient totally paralyzed with Guillain-Barré syndrome, this moving book takes you through the psychological and physical pain of an eleven month hospital stay. BED NUMBER TEN reads like a compelling novel, but is entirely factual. You will meet: The ICU staff who learned to communicate with the paralyzed woman - and those who did not bother. The physicians whose visits left her baffled about her own case. The staff and physicians who spoke to her and others who did not recognize her presence. The nurse who tucked Sue tightly under the covers, unaware that she was soaking with perspiration. The nurse who took the time to feed her drop by drop, as she slowly learned how to swallow again. The physical therapist who could read her eyes and spurred her on to move again as if the battle were his own. In these pages, which reveal the caring, the heroism, and the insensitivity sometimes found in the health care fields, you may even meet people you know.
