The heater in your car

Acces PDF

Automotive

is basically a smaller

version of your
cooling systems

radiator. Hot engine

coolant is circulated

through a small

radiator, often times
called a heater core.

A fan is positioned in

front of the heater

core to blow cold

outside air over the

fins. As this air travels

over the heater core,

Acces PDF

Automotive

it heats up and becomes the hot air which blows out your heater vents.

conditioning systems are (nearly) closed loops with a high-pressure side and low-pressure side. We'll start with the high-pressure side as it leads from the engine to the passenger compartment:

Compressor: The compressor is a pump driven by a belt attached to the

Acces PDF

Automotive

engine's crankshaft.

When the refrigerant is drawn into the

compressor, it is in a

low-pressure gaseous form.
