From 1923 until May 1948, Palestine was under a British Mandate. Beginning in 1927, on the Eve of the tenth anniversary of the Balfour Declaration, Palestine began producing its own money. The coins and banknotes that were legal tender during these two decades are especially interesting both to collectors and historians. A brief history of Palestine up to 1948 and information on the Palestine Currency Board provide background information. Complete numismatic information is then presented for each coin and banknote. Also covered are the mysterious 1927 Holyland Token, counterfeit issues, and vignettes of the religious sites featured on banknotes. Appendices present the text of the British Mandate for Palestine, catalog numbering systems for Palestine coins and banknotes, and a checklist for collectors. (The text does not introduce a new numbering system.) Color and black and white illustrations bring these beautiful pieces of currency, many now rarities, to life.

This book explains how archaeology is used in the politics and nationalism of the State of Israel through its stamps, coins and currency. Taking the reader from the pre-state years to the modern day, Archaeology, Stamps and Coins of the State of Israel catalogs and analyzes the Israeli government issued materials that employ archaeological motifs.

From Afghanistan to Zimbabwe, this comprehensive reference work covers the monetary systems of 203 countries and four confederations. It provides historical and orthographical information for all monetary systems according to country. Chronologies show the evolution of each monetary unit. Orthographies summarize the commonly accepted English spelling of the unit names (singular and plural) as well as known abbreviations and symbols. A glossary lists all the monetary units alphabetically, identifies their countries, and reveals the etymologies of the unit names.

The Coinage of Herod Antipas provides a comprehensive, multifaceted and up-to-date re-examination of the coins of Herod Antipas, the tetrarch of Galilee and Peraea between 4/3 BCE and 39/40 CE.

In the mid-nineteenth century, Jerusalem was rich with urban texts inscribed in marble, gold, and cloth, investing holy sites with divine meaning. Ottoman modernization and British colonial rule transformed the city; new texts became a key means to organize society and subjectivity. Stone inscriptions, pilgrims' graffiti, and sacred banners gave way to street markers, shop signs, identity papers, and visiting cards that each sought to define and categorize urban space and people. A City in Fragments tells the modern history of a city overwhelmed by its religious and symbolic significance. Yair Wallach walked the streets of Jerusalem to consider the graffiti, logos, inscriptions, official signs, and ephemera that transformed the city over the late

nineteenth and early twentieth centuries. As these urban texts became a tool in the service of capitalism, nationalism, and colonialism, the affinities of Arabic and Hebrew were forgotten and these sister-languages found themselves locked in a bitter war. Looking at the writing of—and literally on—Jerusalem, Wallach offers a creative and expansive history of the city, a fresh take on modern urban texts, and a new reading of the Israel/Palestine conflict through its material culture.
