At a price of \u00a3550, the Mopho Keys is positioned between the Mopho module and the Mono Evolver Keyboard, nicely filling a gap in DSI's monophonic range. The improvements to the programming interface and addition of the excellent keyboard really allow you to get the best out of the Mopho's fantastic synth architecture.

They now have the Mopho desktop at around £250, the Mopho Keyboard and the Tetra both at around £550, the Mopho SE at around £700 and the Mopho X4 at approx £950. We think this is a wise move by DSI, though perhaps there's little need to have the Mopho Keyboard in the range now, especially as it uses a different case design and colour scheme to the X4 and SE, which must complicate manufacturing.

- PURE ANALOGUE! So the latest Dave Smith Instrument design is the Mopho, Mono Phonic synthesiser.
