Paper Notebook Looking for a great gift idea with love Ducks ? Need a new journal in your life? This Unique and Funny Journal Notebook is sure to please and make the perfect Christmas or birthday present for men or women. 100 8 x 10 Lined Pages are provided for you to put your thoughts, hopes, experiences, likes, and dislikes. This book includes: 8 x 10 inches 100 Pages Ruled Line Spacing 50 sheets, 100 pages Full wrap around cover design Name and contact page Flexible easy wipe-clean glossy cover And so much more! With this notebook, the possibilities are endless. A great gift idea for anyone on your list: wife, mom, husband, dad, coworker, mother, father, boyfriend, girlfriend, boss.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can ' t bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother ' s best friend , and her soul makes a first step to healing.

Insolent and defiant, the Chants de Maldoror, by the self-styled Comte de Lautréamont (1846-70), depicts a sinister and sadistic world of unrestrained savagery and brutality. One of the earliest and most astonishing examples of surrealist writing, it follows the experiences of Maldoror, a master of disguises pursued by the police as the incarnation of evil, as he makes his way through a nightmarish realm of angels and gravediggers, hermaphrodites and prostitutes, lunatics and strange children. Delirious, erotic, blasphemous and grandiose by turns, this hallucinatory novel captured the imagination of artists and writers as diverse as Modigliani, Verlaine, André Gide and André Breton; it was hailed by the twentieth-century Surrealist movement as a formative and revelatory masterpiece.

Emphasizing fundamental mathematical ideas rather than proofs, Introduction to Stochastic Processes, Second Edition provides quick access to important foundations of probability theory applicable to problems in many fields. Assuming that you have a reasonable level of

computer literacy, the ability to write simple programs, and the access to software for linear algebra computations, the author approaches the problems and theorems with a focus on stochastic processes evolving with time, rather than a particular emphasis on measure theory. For those lacking in exposure to linear differential and difference equations, the author begins with a brief introduction to these concepts. He proceeds to discuss Markov chains, optimal stopping, martingales, and Brownian motion. The book concludes with a chapter on stochastic integration. The author supplies many basic, general examples and provides exercises at the end of each chapter. New to the Second Edition: Expanded chapter on stochastic integration that introduces modern mathematical finance Introduction of Girsanov transformation and the Feynman-Kac formula Expanded discussion of Itô's formula and the Black-Scholes formula for pricing options New topics such as Doob's maximal inequality and a discussion on self similarity in the chapter on Brownian motion Applicable to the fields of mathematics, statistics, and engineering as well as computer science, economics, business, biological science, psychology, and engineering, this concise introduction is an excellent resource both for students and professionals.

Covers the design, construction, operation, diagnosis, service, and repair of automatic transmissions and transaxles.

Forest trees cover one third of the global land surface, constitute many ecosystems, and play a pivotal role in the world economy. This volume details Populus trees, pines, Fagaceae trees, eucalypts, spruces, Douglas fir and black walnut, and offers a first-ever detailed review of Cryptomeria japonica. It thoroughly discusses innovative strategies to address the inherent problems of genome analysis of tree species.
