Dinosaurs belong to a group of animals known as archosaurs. Today this group is represented by birds and crocodiles (some scientists also include turtles in this group). In the past it was much more diverse as it also included all extinct dinosaurs, pterosaurs and many bizarre-looking ancestors of the crocodiles.

Where did dinosaurs come from? | Natural History Museum

Dinosaurs are a diverse group of reptiles of the clade Dinosauria. They first appeared during the Triassic period, between 243 and 233.23 million years ago, although the exact origin and timing of the evolution of dinosaurs is the subject of active research.
