Invisible Leviathan | Marx's Law of Value in the Twilight ...

Murray Smith's Invisible Leviathan provides a comprehensive defence of the labour theory of value, its corollary in the tendency for the rate of profit to fall, alongside a thorough debunking of the so-called transformation problem. In the course of all this, he observes that many commentators on Marx have criticised apparent contradictions in his economic theory, not understanding that the problem lay not within Marx's logic, but in the contradictions of capitalism itself.

Invisible Leviathan: Marxist Critique of Market Despotism ...

Synopsis. In this updated and expanded edition of Invisible Leviathan, Murray E.G. Smith critically explores and makes significant contributions to the debate surrounding Karl Marx's 'capitalist law of value' and its corollary, the law of the falling rate of profit. A powerful case is presented that capitalism has exhausted its potential to contribute to human progress.

The text is broad-ranging, integrating eleven studies that consider the theory of labour-value from historical, philosophical, and economic perspectives. Smith incorporates a thorough review of the controversy that has raged around Marx's theory of labour-value, reporting the key arguments of orthodox Marxists, neo-Ricardians, neo-orthodox Marxists, and fundamentalist Marxists. He concludes that the Marxian theory of labour-value remains a logically coherent and theoretically sound basis for understanding capitalism's historical-structural crises. Also included is a reconsideration of Marx's law of the falling tendency of the rate of profit along with a statistical analysis of long-term trends in the Canadian economy that lend support to Marx's vies.

This original and important contribution to Marxist debates will appeal to an international community of political economists and Marx scholars. Its comprehensive reporting and analysis will also attract a broader audience of historians and philosopher.

In Invisible Leviathan, Murray E.G. Smith refutes the main criticisms of Marx's theory of labour value and argues that human civilization is imperilled by the capitalist imperative to measure wealth in terms of (abstract social labour) and money profit.

This updated and expanded edition critically explores and makes significant contributions to the debate surrounding Karl Marx's 'capitalist law of value.'

The principal theme of the book is that social science is at its best, and most exciting, when it confronts and refutes "cultures of prejudice"intricate systems of beliefs and attitudes that sustain many forms of social oppression and that are, themselves, sustained by ignorance and fear of the unknown and the unfamiliar.

Why should we pay attention to the great social critics like Marx? Americans, especially now, confront serious questions and evidences that our capitalist system is in trouble. It clearly serves the 1% far, far better than what it is doing to the vast mass of the people. Marx was a social critic for whom capitalism was not the end of human history. It was just the latest phase and badly needed the transition to something better. We offer this essay now because of the power and usefulness today of Marx's criticism of the capitalist economic system. eBook: https://bit.ly/2KG6I8v

The principal theme of the book is that social science is at its best, and most exciting, when it confronts and refutes "cultures of prejudice"intricate systems of beliefs and attitudes that sustain many forms of social oppression and that are, themselves, sustained by ignorance and fear of the unknown and the unfamiliar.

Looking to an increasingly perilous and inequitable future, many progressive activists and scholars are seriously questioning the capacity of global capitalism to guarantee the conditions for human well-being and sustainability in the 21st century. This development inspires the central inquiry of Marxist Phoenix: Will the intensifying contradictions and multiple crises of contemporary capitalism incite the emergence of a mass socialist workers' movement committed not merely to the "reform" of capitalism but to its overthrow? This collection of new and previously published essays, articles, and book chapters written over the last two decades makes the case for the indispensability of the Marxist-socialist project to the emancipation of humanity from material insecurity and ever-worsening social antagonism. Only a global workers' movement committed to the fundamental tenets of Marxism—a triumphant Marxist Phoenix rising from the ashes of the multiple defeats of the 20th century—can open the road to real social progress. Interdisciplinary, rigorous, and critically engaged with many currents in contemporary academic discourse, this volume is a timely contribution to the rebirth of a Marxist socialism that is at once scientific, emancipatory, and internationalist in its commitments.

In Marx (s Capital, Method and Revolutionary Subjectivity, Guido Starosta develops a methodologically-minded critical reconstruction of the Marxian critique of political economy, which is shown to be a materialist inquiry into the social and historical determinations of revolutionary subjectivity.
