* Challenges the idea that business success requires leaders to create predictability and maximize control* Demonstrates how embracing, cultivating, and harnessing uncertainty and unexpected events can inspire breakthroughs in all areas of business* Filled with real-world examples of what companies such as Intuit, Gatorade, Four Seasons, and Colgate have achieved through the power of surpriseHow did Gatorade revitalize itself in the wake of Red Bull and Starbucks? How did Etsy come to be? What makes one company or brand thrive while others languish in today's fast-paced, ever-changing marketplace? There's no doubt hard work is involved, but Soren Kaplan shows you can't do it by simply creating a big vision and implementing a set plan. In his trailblazing debut, Kaplan gives business leaders the tools to do exactly what they're taught to avoid: embrace surprise-the new key to business innovation.For Kaplan, breakthrough success is all about "leapfrogging." Instead of fighting against uncertainty, Kaplan reveals how to use it to break down limiting mindsets and barriers to change the game. Using his LEAPS process (Listen, Explore, Act, Persist, and Seize), leaders learn to recognize and harness surprising experiences and events as a way to create solutions that leap beyond the current expectations of customers, partners, employees, and the competition. By highlighting specific ways to transform both good and bad surprises into unique opportunities, Kaplan encourages leaders to compete by embracing counterintuitive ideas, managing paradoxes, and even welcoming failure.Now is the time to challenge assumptions and reinvent what is possible. All organizations-from large corporations to those just starting out-have the potential to take a significant leap forward by turning today's increasingly uncertain environment into a tool for unprecedented success. Kaplan's Leapfrogging is the new handbook for the modern leader.

Every business faces the existential threat of competitors producing cheaper copies. Even patent filings, market dominance and financial resources can't shield them from copycats. So what can we do--and, what can we learn from companies that have endured and even prospered for centuries despite copycat competition? In a book of narrative history and practical strategy, IMD professor of management and innovation Howard Yu shows that succeeding in today's marketplace is no longer just a matter of mastering copycat tactics, companies also need to leap across knowledge disciplines, and to reimagine how a product is made or a service is delivered. This proven tactic can protect a company from being overtaken by new (and often foreign) copycat competitors. Using riveting case studies of successful leaps and tragic falls, Yu illustrates five principles to success that span a wide range of industries, countries, and eras. Learn about how P&G in the 19th century made the leap from handcrafted soaps and candles to mass production of its signature brand Ivory, leaped into the new fields of consumer psychology and advertising, then leaped again, at the risk of cannibalizing its core product, into synthetic detergents and won with Tide in 1946. Learn about how Novartis and other pharma pioneers stayed ahead by making leaps from chemistry to microbiology to genomics in drug discovery; and how forward-thinking companies, including China's largest social media app--WeChat, Tokyo-based Internet service provider Recruit Holdings, and Illinois-headquartered John Deere are leaping ahead by leveraging the emergence of ubiquitous connectivity, the inexorable rise of intelligent machines, and the rising importance of managerial creativity. Outlasting competition is difficult; doing so over decades or a century is nearly impossible--unless one leaps. Ultimately, Leap is a manifesto for how pioneering companies can endure and prosper in a world of constant change and inevitable copycats.
