Dada includes many of the key figures in the history of modernism, such as Hans Arp, Marcel Duchamp, Max Ernst, Hannah Hoch, John Heartfield, Francis Picabla, Kurt Schwitters, and Sophie Taeuber, and introduces artists who are less well known. This book explores the variety of art-making practices that emerged between 1916 and 1924 in the movement's primary centers: Zurich, Berlin, Hannover, Cologne, New York, and Paris. Six city essays by scholars of the movement; an illustrated chronology; more than forty artists' biographies; period photographs; and extensive plate sections document a provocative and influential artistic era. This illustrated book accompanies Dada, the most comprehensive museum exhibition of Dada art ever mounted in the United States, on view in 2006 at the National Gallery of Art,

Washington, and The Museum of Modern Art, New York. The exhibition was on view at the Musee national d'art moderne-Centre Pompidou in Paris in 2005.

Renowned French otolaryngologist Jean Abitbol, a lifetime student of the human voice, takes readers on an unforgettable odyssey spanning man's first use of voice through the acquisition of language to the use of voice as an expression of self. With great wit and charm, Dr. Abitbol's narrative encompasses everything from the psychological to the physiological, from explaining the workings of the voice to celebrating the human voice's highest achievements. He describes a fascinating history of the voice, its origins, its course since the Homo Sapiens' first sentences, its episodes of hoarseness, and its achievements, from the newborn cry to the coloratura soprano, from the impersonator to the ventriloquist. After exploring what is known about the voice, Dr. Abitbol tells us what our voices are capable of. He examines what he describes as "the magic of the voice": the voice as a fingerprint, a reflection of our personality in expressing our sex and sexuality. A great portion of this odyssey is devoted to singing and singers, both to the complexity of singing in general and to lyrical singing, the intricacies of which requires

participation of the mechanical, emotional, and cerebral systems. The mysteries of the voice unfold as Dr. Abitbol guides readers through the latest physiological and pathological research using examples of historical figures', patients', and celebrities' voices to explain how the ways in which the body moves affect the way the voice sounds and how vocal quality is unique to each human being. A unique tour de force of the human vocal instrument, *Odyssey of the Voice* changes the way we think about our voices.

Inspired by the presence of Jesus, this book is offered to you as yet another possible aid to deepen your understanding of "A Course in Miracles's" basic concepts, as one more dispensable step along the journey without distance to the home that we never, in truth, have left. Through its question and answer format, it provides an understanding of how to live the teachings of ACIM. The authors were inspired to create this book through an amazing set of circumstances, which they share with their readers. They have both followed the teachings in "A Course in Miracles" as their spiritual path for more than twenty-five years.

The ultimate bartender's book, this richly illustrated hardcover compilation of 750 recipes comprises non-alcoholic drinks as well as sours, toddies, flips, slings,

This is the fourth volume in the Oratory of Classical Greece series. Planned for publication over several years, the series will present all of the surviving speeches from the late fifth and fourth centuries B.C. in new translations prepared by classical scholars who are at the forefront of the discipline. These translations are especially designed for the needs and interests of today's undergraduates, Greekless scholars in other disciplines, and the general public. Classical oratory is an invaluable resource for the study of ancient Greek life and culture. The speeches offer evidence on Greek moral views, social and economic conditions, political and social ideology, and other aspects of Athenian culture that have been largely ignored: women and family life, slavery, and religion, to name just a few. This volume contains works from the early, middle, and late career of the Athenian rhetorician Isocrates (436-338). Among the translated works are his legal speeches, pedagogical essays, and his lengthy autobiographical defense, *Antidosis*. In them, he seeks to distinguish himself and his work, which he characterizes as "philosophy," from that of the sophists and other intellectuals such as Plato. Isocrates' identity as a teacher was an important mode of political activity, through which he sought to instruct

his students, foreign rulers, and his fellow Athenians. He was a controversial figure who championed a role for the written word in fourth-century politics and thought.
