Manual of Psychiatric Care for the Medically Ill delivers a practical approach to accurate psychiatric diagnosis and treatment in the medical-surgical setting. The editors have updated the literature reviews of their widely used 1996 American Psychiatric Publishing publication A Case Approach to Medical-Psychiatric Practice and have added easy-to-use summaries, Web resources, checklists, flowcharts, and worksheets-all designed to facilitate and teach the process of psychiatric consultation. The appended study guide makes this book even more valuable as an educational tool. Intended as a companion guide to comprehensive textbooks in psychosomatic medicine, this concise volume combines medication updates with "how-to" strategies for the psychiatric treatment of patients with cardiovascular, hepatic, renal, and pulmonary disease; gastrointestinal symptoms; delirium; HIV; hepatitis C; steroid-induced psychiatric syndromes; and organ transplantation. A special feature is the comprehensive chapter on the treatment of psychiatric illness in pregnancy. Each chapter summarizes the literature, emphasizing diagnostic and treatment considerations for patients with psychiatric symptoms and medical illnesses. Representing the work of 24 contributors, this useful, highly informative volume features Checklists, flowcharts, and worksheets that can be photocopied and brought to the patient's bedside for use during the clinical consultation. These templates help focus the information-gathering process, organize the data, and generate important documentation. Standardized assessment instruments and questionnaires, such as the Michigan Alcohol Screening Test, Delirium Rating Scale-Revised-98, and HIV Dementia Scale, which assist in consultation and evaluation. Summaries and charts of differential diagnoses to assist psychiatric consultation to medical patients, including Web addresses to access the latest information on a particular condition or treatment. A study guide in case-question-answer format for selected chapters. This volume also includes a "how-to" chapter on assessing decisional capacity, complete with a worksheet for gathering information and documenting informed consent. It also features practical reviews of psychotherapeutic issues, such as a primer for what to do when patients ask about spiritual issues. Concluding chapters present short, practical guides on addressing general psychological issues occurring in medical patients. This proven manual -- already being used to teach residents the core curriculum in Consultation-Liaison Psychiatry and On-Call Preparedness at Bellevue Hospital in New York City -- will be welcomed by general psychiatrists, consultation-liaison and psychosomatic medicine fellows, residents, and medical students everywhere.

The Coach's Mind Manual combines the latest findings from neuroscience, psychology, and mindfulness research to provide an accessible framework to help coaches and leadership development specialists improve their awareness of the mind, enhancing their coaching practice. Syed Azmatullah explains how such knowledge can be used to guide clients on a journey of self-discovery, facilitating transformational changes and enriching their performance and personal lives. Part One considers the mind's management committee, the cerebral cortex, and how its contrasting functions can be accessed to improve problem solving skills. Part Two considers the mind's middle management, the limbic system, balancing executive direction with our social and emotional needs, driving motivation around core values. Part Three examines how the environment, via the body, influences our mental infrastructure at various stages in life, guiding the selection of interventions. Part Four looks at interpersonal dynamics and how to maximise team performance. Part Five considers the power of collaboration for generating the culture needed to improve the sustainability of our global community. Each section contains self-reflection exercises and experiential role-play to help clients derive benefit from their new personal insights. Coaches are encouraged to combine the broad range of concepts presented with their own experience, creating a contextually-driven coaching process. By focusing on the mind as the target for coaching interventions Azmatullah establishes a comprehensive framework for achieving transformational change. The Coach's Mind Manual is ideal for all professionals engaged in adult development including executive coaches, business coaches, human resource development professionals, leadership development professionals, management consultants and organisational development professionals.
