Physics b) Distance travelled is given by the area under the graph = $(5 \text{ s} \times 20 \text{ m}) + (0.5 \times 5 \text{ s} \times 15 \text{ s}) = 137.5 \text{ m}$ 9 a) Average speed is found by dividing the total distance a body has travelled by the time it has taken; the speed may vary from moment to moment during this time. The instantaneous speed is

Physics Section A

All the answers and notes are written by me and if there is any similarity in the content then it is purely coincidental. But this is not an alternative to the textbook. You should cover the specification or the textbook thoroughly. This is the quick revision to help you cover the gist of everything.
