If you notice the 360 slowing down, clean out all of the filters and baskets. Start with the filter screen in the quick disconnect on the hose. In many cases, cleaning the screen in the quick disconnect will solve the problem and the 360 will operate as normal. If that doesn't work, clean out the skimmer and pump baskets and the pool filter.

checking the wheel RPM. • Always remove the Polaris cleaner before swimmers enter the pool.

POLARIS 360 OWNER'S MANUAL Pdf Download | ManualsLib

Place the mechanism in the backup valve case. Screw the case back together by hand, ensuring you do not overtighten. Examine the hose the backup valve is attached to. Ensure the backup valve opening points towards the Polaris 360 pool sweep. If a backup valve is facing the wrong direction, it will be unable to move the pool sweep away from the corners.

How to Troubleshoot a Polaris 360 Backup Valve | Hunker

Troubleshoot the 360 to fix any errors in operation. Running with Less Power Than Normal. Since the 360 is basically an automatic vacuum cleaner for your pool, there may be times when the machine starts to slow down due to the filters clogging with debris. If you notice the 360 slowing down, clean out all of the filters and baskets. Start with the filter screen in the quick disconnect on the hose.

first portion of the hose that ' s attached directly to the cleaner) to match the pool depth. Run the hose from the wall port to the distant point again. If it ' s still too long, cut equal parts from the remaining hose sections.

Polaris Pool Cleaner Troubleshooting: Top 10 Problems Solved

One of the first steps in Polaris pool cleaner troubleshooting for tangles is to check the hose length. You do need a little play in the hose so the cleaner can move freely, but a too-long hose will have a hard time swiveling along with the cleaner. It ' s easy to figure out how long the hose needs to be.

Polaris Pool Cleaner Troubleshooting Made Easy

My 360 also periodically raises the rear wheels. Easily fixed by adjusting the float on the 360 closer into the 360. If that does not work or its all the way already, try adjusting the Polaris water supply valve (on the pump skid) to less pressure.
