'Godan' is an epic in Hindi prose. It is the most famous work of Munshi Premchand. 'Godan' gives a vivid picture of the condition of Indian farmers during the author's lifetime. The novel is relevant today because the rural folks' problems still exist. Farmers have generally been exploited by money-lenders, government officials and superstitious community members. Hori, a well-off cultivator, suffers for his dependence on these exploiters. He works very hard, grows various crops, yet starves with his family because almost all his crops are given away to clear the creditor' dues. He efforts to protect his family dignity but fails because he was continuously exploited.

Statistical physics is a core component of most undergraduate (and some post-graduate) physics degree courses. It is primarily concerned with the behavior of matter in bulk—from boiling water to the superconductivity of metals. Ultimately, it seeks to uncover the laws governing random processes, such as the snow on your TV screen. This essential new textbook guides the reader quickly and critically through a statistical view of the physical world, including a wide range of physical applications to illustrate the methodology. It moves from basic examples to more advanced topics, such as broken symmetry and the Bose-Einstein equation. To accompany the text, the author, a renowned expert in the field, has written a Solutions Manual/Instructor's Guide, available free of charge to lecturers who adopt this book for their courses. Introduction to Statistical Physics will appeal to students and researchers in physics, applied mathematics and statistics.

This book focuses on effective communication and is designed to help the reader achieve greater fluency in English. Adopting a practical approach, it makes the important distinction between what is essential ('core') for intelligibility and what is relatively unimportant ('peripheral').

The author looks at a place where the conditions for religious conflict are present, but active conflict is absent, focusing on a Muslim majority Punjab town (Malkerkotla) where both during the Partition and subsequently there has been no inter-religious violence.
