An introductory section is devoted to the morphology, distribution and life history of the Dynastinae (with notes on the pest status of several species on agricultural crops, palms and forests). The major part of the book consists of keys to the 8 tribes in the subfamily, in some cases with separate keys for the members in the different geographical regions (Nearctic, Neotropical, Palearctic, Oriental, Ethiopian, Pacific and Australasian).

The Dynastinae Of The World

This title has tables giving years of rule and family relationships (in the male line unless otherwise indicated) for the reigning families of the world, from Horus Aha, first pharaoh of Egypt, to Abdallah, present king of Saudi Arabia. Included in the tables are data regarding regencies and co-regencies, abdications and depositions, interregna and dynastic unions, mandates and protectorates...

Dynasties of the World — Oxford Reference

The subfamily Dynastinae is a cosmopolitan group of beetles widely distributed in most biogeographical regions of the world (except in the polar regions), and the major- ity of species are...
