The pioneering emergency ultrasound guide—updated and expanded with coverage of the newest technologies /p> Emergency Ultrasound is firmly established as the first state-of-the-art reference on the training, techniques, and diagnostic skills needed to perform successful ultrasound exams in the emergency department. Utilizing a templated chapter format, this trusted resource presents a wide range of detailed guidelines on performing ultrasound exams, case studies, and side-by-side comparisons of normal and abnormal scans. Emergency Ultrasound, Second Edition, is fully updated and expanded to include the latest uses of this crucial diagnostic tool, including Doppler Ultrasound for deep vein thrombosis. Taken together, this groundbreaking text is the one you'll rely on for every kind of diagnosis in the emergency setting, from soft tissue infections and peritonsillar abscess, to foreign bodies and lumbar puncture and arthrocentesis. Features: NEW! Chapters on ocular applications, prehospital applications, and ultrasound-guided procedures NEW! Content that features the latest instruments NEW! Numerous color Doppler images, plus hundreds of traditional black and white ultrasound images NEW! DVD with videos showing the most current ultrasound procedures performed in real time Coverage of ultrasound in trauma, cardiac, hepatobiliary, renal, testicular, and other applications A templated chapter organization that consists of key points; introduction; clinical considerations and indications; anatomic considerations; technique; common abnormalities; pitfalls; case studies; references; and more Focus on common findings and pitfalls in every clinical chapter Case studies in each chapter

ITIB ' 2018 is the 8th Conference on Information Technology in Biomedicine, hosted every two years by the Department of Informatics & Medical Devices, Faculty of Biomedical Engineering, Silesian University of Technology. The Conference is organized under the auspices of the Committee on Biocybernetics and Biomedical Engineering of the Polish Academy of Sciences. The meeting has become an established event that helps to address the demand for fast and reliable technologies capable of processing data and delivering results in a user-friendly, timely and mobile manner. Many of these areas are recognized as research and development frontiers in employing new technology in the clinical setting. Technological assistance can be found in prevention, diagnosis, treatment, and rehabilitation alike. Homecare support for any type of disability may improve standard of living and make people ' s lives safer and more comfortable. The book includes the following sections: Ø Image Processing Ø Multimodal Imaging and Computer-aided Surgery Ø Computer-aided Diagnosis Ø Signal Processing and Medical Devices Ø Bioinformatics Ø Modelling & Simulation Ø Analytics in Action on the SAS Platform Ø Assistive Technologies and Affective Computing (ATAC)

Issues in Education by Subject, Profession, and Vocation: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Education by Subject, Profession, and Vocation. The editors have built Issues in Education by Subject, Profession, and Vocation: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Education by Subject, Profession, and Vocation in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Education by Subject, Profession, and Vocation: 2011 Edition has been produced by the world ' s leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at http://www.ScholarlyEditions.com/.

A complete multidisciplinary guide to breast surgical oncology Includes DVD with surgical video clips and breast ultrasound atlas A Doody's Core Title for 2011! A British Medical Association Book Awards Runner-up, Oncology category! *Kuster's new textbook of Breast Surgical Oncology is a comprehensive volume that contains exceptionally detailed and thorough information about the diverse aspects of breast cancer care, and would serve as a valuable resource for any breast cancer clinician, regardless of their specialty. ... (the book) is easy to read and navigate, where clinicians can quickly obtain reliable, up-to-date information on a broad range of topics relevant to breast cancer. --Annals of Surgery, August 2010 4 STAR DOODY'S REVIEW! "...a comprehensive and authoritative synthesis of current information is sorely needed, and this book fulfills that need admirably ...The figures (many in color) and tables reproduce beautifully. The chapters on ultrasound, clinical trials, and plastic surgery, are particularly valuable. This is a terrific and incredibly useful book on breast surgical oncology, and will be an important reference in the field." --Doody's Review Service Written by an internationally recognized multidisciplinary team of authors, Kuster's Breast Surgical Oncology is the first text specifically dedicated to breast surgical oncology. Turn to any page, and you ' ll find cutting-edge, evidence-based information and insights—supplemented by a full-color presentation and a companion DVD—all designed to help provide a solid foundation for current and future best practices. Kuster's examines all clinically relevant knowledge in the field, from the pathology of the breast and clinical management, to follow-up and complications following diagnosis and therapy. The book also focuses on the next wave of molecular studies that represent the future of the discipline. Features Complete integration of the relevant disease pathology with clinical management Major sections on both oncoplastic and advanced operative management procedures An entire section on landmark breast cancer clinical trials that highlights essential knowledge and evidence in the field Full-color design with 750 illustrations that depict anatomy, breast cancer pathology, and trial results A DVD with surgical video clips that details some of the important surgical techniques and procedures featured in the text An entire section on breast imaging and an atlas on breast ultrasound and biopsy techniques that facilitate accurate diagnosis and treatment Timely, special chapter on the influence of the media and the internet on breast cancer care and the funding of breast cancer research A detailed overview of currently open and accruing clinical trials, along with the future critical questions that must be answered to move the field forward Coverage of molecular findings that provides an enhanced perspective on the full spectrum of malignancies with which they work

Spinal Cord and Peripheral Motor and Sensory Systems, Part 2 of The Netter Collection of Medical Illustrations: Nervous System, 2nd Edition, provides a highly visual overview of the anatomy, pathology, and major clinical syndromes of the nervous system, from cranial nerves and neuro-ophthalmology to spinal cord, neuropathies, autonomic nervous system, pain physiology, and neuromuscular disorders. This spectacularly illustrated volume in the masterwork known as the (CIBA) Netter "Green Books" has been expanded and revised by Drs. H. Royden Jones, Jr., Ted M. Burns, Michael J. Aminoff, Scott L. Pomeroy to mirror the many exciting advances in neurologic medicine - offering rich insights into neuroanatomy, neurophysiology, molecular biology, pathology, and various clinical presentations. Consult this title on your favorite e-reader with intuitive search tools and adjustable font sizes. Elsevier eBooks provide instant portable access to your entire library, no matter what device you're using or where you're located. Get complete, integrated visual guidance on the cranial nerves, spinal cord and peripheral motor and sensory systems with thorough, richly illustrated coverage. Quickly understand complex topics thanks to a concise text-atlas format that provides a context bridge between primary and specialized medicine. Clearly visualize how core concepts of anatomy, physiology, and other basic sciences correlate across disciplines. Benefit from matches Netter illustrations that offer precision, clarity, detail and realism as they provide a visual approach to the clinical presentation and care of the patient. Gain a rich clinical view of all aspects of the cranial nerves, spinal cord and peripheral motor sensory systems in one comprehensive volume, conveyed through beautiful illustrations as well as up-to-date neuro-radiologic images. Clearly see the connection between basic science and clinical practice with an integrated overview of normal structure and function as it relates to neuro-pathologic conditions. Grasp current clinical concepts regarding the many aspects of adult and child neurologic medicine captured in classic Netter illustrations, as well as new illustrations created specifically for this volume by artist-physician Carlos Machado, MD, and others working in the Netter style.
